Liaison Organizations

Liaison organizations are governmental or private activities with developmental programs in the areas of space-related data and information systems. Liaison participation in the working groups is encouraged but not required. When Liaison participation occurs, it usually will be focused on a particular subject of interest to the Liaison organization as opposed to standing involvement, which is not precluded.

For more information about becoming a CCSDS Liaison Organization, please contact the secretariat@mailman.ccsds.org.

I am the CCSDS PoC. Fred is the TC20/SC14 PoC for system architecture. And, you will love this, we need to add another TC20/SC14 PoC for Terminology, Dan Oltrogge, who also has a CCSDS "role".

**This is a pair of separate "liaison" records, but they are
really the OMG PoC and the person with the CCSDS liaison
"role". In this case that mostly means "MOIMS SM&C
WG", but it really should be broader because CSS has
potential interests and SEA has definitive ones in SysML
and UML. Mario does not seem to cover those topics.**
