

CSS-R-2018-11-001, *Resolution concerning project creation for update of Cross Support Transfer Service – Specification Framework*

The CSS Area,

CONSIDERING that the CROSS SUPPORT TRANSFER SERVICE – SPECIFICATION FRAMEWORK, CCSDS 921.1-B-1, (“the recommendation”) is a published recommended standard of CCSDS;

and RECOGNIZING that the recommendation is the basis for Cross Support Transfer Services and therefore must be revised as new required service capabilities are identified;

and RECOGNIZING that the CSTS WG has completed revisions for the recommendation to support new service capabilities identified for the Forward Frame Cross Support Transfer Service;

and NOTING that, per the formal procedures of CCSDS that a project for updating the recommendation is needed;

RESOLVES to create the formal project for update of the recommendation;

and REQUESTS that the CCSDS Secretariat initiate polling for project creation.

[End Resolution]
