RID Title :  XML Schema fragments and Examples : italic or normal font?			Originator signature : Mathias Moucha Date : May 18, 2006		
Discrepancy/violated requirement :  There are multiple XML Schema fragments and examples in the recommendation. Some are in italic, other not.					
Suggested solution :  It would be interesting to define a rule for the look of XML schema fragments and for examples. For example : "every XML Schema fragment shall be written with normal font (no italic) and every example shall be written with italic font".
